

FEATURES

- Smallest in its class, it is extremely compact at approx. 2/3 the size of previous products.
Compared to our previous miniature type CT relay, the 1 Form C as well as the 10-pin and 8-pin twin types take up approx. two-thirds the space and volume.
- High-capacity 25 A load switching
High capacity control capable of motor lock load switching at 25 A, 14 V DC is possible despite contact size.
- Pin in Paste (PiP)* compatible model added
Models compatible with the recently increasingly popular PiP technique (reflow solder mounting) have been added.
PiP compatible models are the flux tight type.
* The PiP method may sometimes be referred to as THR (Through-Hole Reflow).
- Environmental protection specifications
Cadmium-free contacts and use of lead-free solder are standard. Environmental pollutants are not used.

TYPICAL APPLICATIONS

- Power windows
- Automatic door locks
- Power mirrors
- Power sunroofs
- Power seats
- Lift gates
- Smart junction box related products, etc.

Notes:

*1 This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.

*2 Please inquire if you will be using the relay in a high temperature atmosphere (110°C 230°F).
