

PLC/HMI Starter Kit (FP0R)

A complete package for a special, one-time price! The Starter Kit contains a compact and powerful PLC with 14 or 32 inputs/outputs, including programming software, all necessary cables and a touch panel.

Contents:

- ▶ PLC FP0RC14R and the programming software FPLIN Pro
- ▶ Power supply unit for FP0R, FP-PS24-024E
- ▶ 3,8" touch panel GT02 and the programming software GTWIN
- ▶ RS232C or USB programming cable for PLC and HMI, cable to connect the FP0R and GT02, power supply cable

= 349,- (Net price / euro)

Contents:

- ▶ FP0RC32P and programming software FPLIN Pro
- ▶ Power supply unit for FP0R, FP-PS24-024E
- ▶ 3.5" touch panel GT03-E and the programming software GTWIN
- ▶ USB programming cable for PLC and HMI, cable to connect the FP0R and GT03-E, I/O cable set for FP0R, power supply cable

= 475,- (Net price / euro)

The bright touch panel of the GT02 (240x96 pixels, STN monochrome, IP67) and GT03-E (320x240 pixels, TFT monochrome, IP67) display messages and machine data in high contrast, making them easy to read. With a depth of just 28mm/28.4mm, the GT02/GT03-E requires little mounting space. When using the GT02, the 5VDC power supply is provided via the PLC's TOOL port.

The FP0R PLC is perfectly suited to control machines and equipment. Due to its expanded memory, ability to process commands more quickly than previous compact controllers, and integrated positioning functionality for up to four axes (i.e. no extra positioning unit required), the FP0R is equipped to handle a great many applications.
